

LPE are recruiting now for the next intake of apprenticeships starting in September 2017.

We are looking for:

2 x welding and fabrication apprentices

1 x toolroom apprentice

The four year apprenticeship scheme at LPE enables the apprentice to gain qualifications which are obtained through offsite formal learning and work place experience. This will involve the use of a wide range of techniques and equipment to manufacture precision sheet metal components.

Apprentices will receive training in all areas of the production processes at LPE in the first year, and will then specialise in the area noted from year two until the end of year four.

Qualifications: Minimum of 4 national grades preferably including maths and English

You must be reliable, willing to learn and able to use your initiative. You should have good timekeeping, good communication skills and be able to work as part of a team.
